(REAL NAME)

This review is from: Viva Practice for the FRCS(Urol) Examination (Masterpass Series) (Paperback)

Just passed my FRCS (Urol) and this was by far the best book I used. By the end, it was the only book I used. Gives concise details on all the major topics for the exam and most importantly, give the relevant references and figures which can be quoted in the viva. Importantly, this is not only useful for the viva, it also probably has the vast majority of data needed for the MCQs as well so should be bought early.

What I found very useful was to summarise all of the chapters into the viva topics and to leave gaps for extra details which you can pick up from journals and the revision course. This book, combined with the EAU guidelines, probably has enough between them to comfortably pass both sections of the exam.
